Cable unwinder in use position

Cable drum on top of the LITEC-250 Pocket

Drum with an inner diameter of 20 mm

The facts:

A load-dependent, maintenance-free automatic brake brings the device to a halt after a short, controlled follow-up spin

if the cable pull is interrupted.

The roll-off brake is in its braking effect with light wire as well as with heavier cable drums always according to the currently applied weight and takes into account so that for example, a heavy drum becomes lighter when unrolling.

The **LITEC® 250 POCKET** is light, slim, flat, compact, robust, space - saving, maintenance-free, non-slip and stable.

Carries about 200 times of its own weight.

Technical specifications:

Diameter: approximately 25 cm

Bezel height: approximately 55 mm

Weight: approximately 1kg

Load capacity: approximately up to 190 kg

Mandrel: 50 mm diameter, removable for mounting of drums with small inner diameter (from 13 mm).
